

# FM WORKS MOBILE

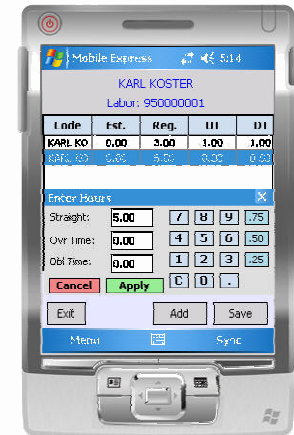

Work Order & Maintenance Management

**FM Works Mobile™** brings the power, innovation, productivity and the world renowned user-friendliness of the FM Works System to an innovative handheld environment.

## Designed for Ease of Use by Maintenance Workers

- Work online or offline as needed
- Tabbed interface with large clear labels
- Innovative pop-up screens for numerical data entry reduce the use of "graffiti"
- Convenient interface lets users "tap" their way around without needing to use complex menus
- Interface is designed with large screen objects for easy "targeting" with the stylus
- Built-in Wireless Indicator constantly informs the user of the current wireless signal strength by changing to different colors

## WORK EXPRESS

- Start off seeing only your individual work requests and then filter based on asset tag, ID, serial number, request number, etc.
- Easily update status, time worked, notes, etc.
- Enter new work requests directly on the PDA
- Use built-in manual and automatic work timers to accurately determine your labor time

## ASSET SURVEYS

- Download equipment, rooms and other asset inventory to the handheld so it can be field verified, updated, inventoried, audited, etc.
- Add new items as they are discovered in the field
- Filter items as they are scanned and add default data for new equipment in one easy step

## PARTS MANAGER

- Parts store / crib users can walk around the parts area and quickly pull up parts data, update inventory quantities, and more, using either a barcode scanner or by picking parts from a drop-down list
- Assign parts to a work request
- Receive new inventory and make inventory adjustments on the fly

## Runs on Windows Mobile Technology

- Runs on PDAs using Windows Pocket PC 2003 with Windows Mobile 5.0, 6.0, 6.1 or 6.5
- Use with or without a barcode scanner
- Connect via WiFi, cellular and/or cradled
